

SUMMARY OF FLOODPLAIN IMPACTS

Date: October 27, 2022

Project ID: 117361

Floodplain Affected: Cranberry Creek

Description of Project: Rehabilitation of Bridge M-15.463 over Cranberry Creek

Why must this project be located in the Floodplain?

The bridge crosses Cranberry Creek, which necessitates some work within the floodplain.

What alternative sites were considered, if any?

Not applicable, as relocating this bridge is not a possibility.

Were any mitigation measures utilized on this project? If so, please describe.

None are necessary, as the work is not extensive enough to cause substantial affect to the floodplain.

To the best of my knowledge, this project has complied with all applicable Local, State, and Federal Floodplain protection standards.
