PUTNAM COUNTY ENGINEER

PUTNAM COUNTY DITCH ENCLOSURE 2023
Putnam County (OH)
OTTAWA, OH

Due to continuing increases in most of our material costs, our Quotation Terms and Prices are only good if accepted and a Firm Order is confirmed and received by us within and no later than 30 days from the original Quote date. The prices quoted herein are subject to increase for any Orders received and confirmed more than 30 days from the Quote date at NCPI's sole discretion. Additionally, unless specifically otherwise agreed in writing, the prices quoted herein will not be valid or binding upon Northern Concrete Pipe and will be subject to increase for any deliveries scheduled to occur or occurring more than 120 days after the original Quote date. We are experiencing supply chain shortages and increasing lead times beyond our control for critical materials which are significantly impacting our manufacturing and production ability and our inventory of available products. Based upon the current supply chain shortages and delays, we anticipate the potential need to allocate our available manufacturing output among our customers as authorized by the Uniform Commercial Code and will provide our customers with the requisite allocation notice when and if required. Accordingly, we cannot and do not guaranty any delivery dates or the pricing that will be in effect on those delivery dates for any quoted precast products due to critical materials supply chain shortages and/or delays and/or cost escalation. NCPI shall not be responsible or liable for any damages, direct, indirect or consequential, and shall not be subject to back charges or claims of whatsoever nature arising out of or caused by delays that you may incur due to our inability to deliver products as anticipated or scheduled because of these critical materials supply chain issues. In consideration of the anticipated need to allocate inventory among our various customers, until further notice, NCPI expressly reserves the right to refuse to stockpile deliveries at any particular jobsite or allow pick up of product from our yard absent prior agreement to do so.

If any portion of our products to be used on your project may be delivered after the 120 day firm pricing window, even if due to allocation delays, you may wish to consider adding potential cost increases or delay costs to your bids to cover that potential exposure as you agree that NCPI will not be responsible or liable for any such additional costs or damages you may incur. Due to the unique supply chain circumstances impacting our manufacturing production, we cannot sign any other Purchase Order to implement or confirm an Order for this Quotation and acceptance of this Quotation, by signing this Quote is NCPI's only approved method of accepting a purchase order.

The prices quoted below have been figured based on the classes and quantities quoted. If the project calls for a different class of pipe or if the final ordered quantities differ from the quote, then pricing may be subject to change.

Quantity	UOM	Description	Unit Price	UOM	Total
Storm Sewer					
848.00	LF	72" C-76-III Storm w/Rubber Joints	322.76	/ LF	273,700.48
Miscellaneous					
10.00	EA	30# Pail Joint Lube (48/Pallet)	65.00	/ EA	650.00

All Pipe quoted above will be made in conformance with ASTM C76 with Rubber Joints conforming to ASTM C443 and shall also meet the requirements of ODOT 706.02.

The Contractor must visually inspect all pipe for damage prior to unloading the delivery truck. Any pipe damaged in transit must be returned to the plant on the original delivery truck for credit. The Supplier has no control over what happens to the pipe after it is unloaded, therefore the Supplier will assume no responsibility whatsoever for the Contractor's installation efforts and techniques or any testing results obtained thereby. Any future PO's generated from this quotation must include this paragraph.

PRICES ARE FIRM THIRTY DAYS FROM DATE OF QUOTE ONLY
ALL PRICES QUOTED AS NET 30th AND SUBJECT TO NCPI's STANDARD TERMS AND CONDITIONS
